since the mid 1970s there has been an extraordinary renewal of interest in early modern architecture both as a way of gaining insight into contemporary architectural culture and as a reaction to neoconservative postmodernism this book undertakes a critical reappraisal of the notion of modernity in mexican architecture and its influence on a generation of mexican architects whose works spanned the 1920s through the 1960s nine essays by noted architects and architectural historians cover a range of topics from broad based critical commentaries to discussions of individual architects and buildings among the latter are the architects enrique del moral juan o gorman carlos obregón santacilia juan segura mario pani and the campus and stadium of the ciudad universitaria in mexico city relatively little has been published in english regarding this era in mexican architecture thus modernity and the architecture of mexico will play a groundbreaking role in making the underlying assumptions ideological and political constructs and specific architect s agendas known to a wide audience in the humanities likewise it should inspire greater appreciation for this undervalued body of works as an important contribution to the modern movement

este libro tiene como propósito fundamental explicar en qué consiste la arquitectura moderna esto podría parecer bastante pretencioso pero actualmente circulan tantos malentendidos que aportar cierta claridad se ha convertido en una necesidad urgente por razones de justicia es preciso recordar lo que realmente quería el movimiento

moderno y poner de manifiesto lo que efectivamente consiguió algunos autores sostienen que el movimiento moderno es una mistificación que en realidad los arquitectos modernos no tenían ninguna ideología en común y que por tanto la arquitectura moderna no existe sin ninguna duda el movimiento moderno tenía un fundamento y una orientación y sólo cuando se comprenda esto podremos hacer una evaluación justa de sus resultados incluidos los empeños posmodernos de este modo encontraremos un punto de partida para continuar la búsqueda de una arquitectura democrática para nuestra época

promesa de transformación por su aparente capacidad para transformar ciudades sucias y abarrotadas en espacios amplios de viviendas generosas ubicados en paisajes modelados en esta breve introducción adam sharr expone el desarrollo de esta arquitectura que ha creado poderosísimas imágenes culturales apoyándose en las innovaciones de las técnicas de construcción así como de los materiales que la identifican como son el acero el cristal y el hormigón y teniendo en cuenta de forma insoslayable la incorporación de instalaciones como las correspondientes a la luz eléctrica y el aire acondicionado para acabar planteándose si la arquitectura contemporánea sigue siendo fundamentalmente moderna

maybe the global village metaphor has never been more accurate than it is today where societies join forces in the fight against the covid 19 pandemic in a global coordinated effort possibly never tested before in the known history of humankind although we are sure that in the past some other shared demands have united the different peoples of the world this has never been so strongly necessary mainly in what the global scientific community is concerned this

is a fight for the survival of a society however we should not lose sight of what we are fighting for we fight together for people not just for the abstract value of human life but for life in society as a whole including its moral and ethical aspects the topics of this book are based on this claim on what makes it possible we do not build our lives in a vacuum or in distant invisible cities but through a higher value which represents physical life in society the city built by the discipline of urbanism this book is a spin off of the international research seminar on urbanism siii2020 inspired by the contents of twelve research seminars a group of researchers from the universities of barcelona lisbon and são paulo discuss the contemporary agenda of research in urbanism following the conference a selection of 35 original double blind peer reviewed research papers were brought together with different perspectives about such an agenda

this is the proceedings of the international congress of graphic design in architecture ega 2018 held in alicante spain may 30 june 1 2018 about 200 professionals and researchers from 18 different countries attended the congress this book will be of interest to researchers in the field of architecture and engineering topics discussed are innovations in architecture graphic design and architecture history and heritage among others

la historia del arte y la arquitectura considerada como un corpus cerrado de especialización temática en nuestra opinión no tiene razón de ser así pues el presente programa docente que aborda los años de la modernidad no sólo se enfrenta al arte y la arquitectura de su tiempo sino también al urbanismo la literatura la filosofía la economía y la estética desde una voluntad marcadamente interpretativa su principal lugar de análisis es la gran ciudad sumida en una fase de metropolización irreversible en ambientes urbanos como londres parís viena berlin moscú chicago o nueva york destaca la riqueza de las relaciones entre lo nuevo y lo viejo en contextos en los que las huellas del pasado conviven con un futuro imaginado
